

IT4223 Web Development

Developing an Extensible Style Sheet (XSL) with XML

Due: 2/4/03

Your Name:

The Assignment:

- Using your textbook's coverage of XML and XSL and any other appropriate textbook section or resource, develop an XSL file to be used as a style sheet for developing your weekly exercises. Start with the XML and XSL files for the “Concept Papers” that are on the web site.
- Why is using a XSL a good approach to Web Development? When might it not be appropriate? (Be explicit and detailed about your criteria and how this approach fulfills them for Web Development.)

Hints:

IE6 has a XSLT engine for rendering your pages without a web server.
