

IT4223 Web Development

Developing a Layout for the Privacy Project Home Page

Due: 2/11/03

Your Name:

The Assignment:

- Consider the desired functionalities for the Privacy Web Site we are developing in class. These include:
 - Count web site visitors and register participants
 - Serve as advertising for the conference
 - Explain the goals and objectives of the grant
 - List grant partners and sponsors
 - Explain how to participate in the conference and white paper development
 - Provide online forum
 - Provide online registration of forum participants
 - Provide for downloading of conference files
- Using benchmark web sites, develop a layout for the home page of the Privacy Web Site.
- Using your textbook's coverage of HTML and any other appropriate textbook section or resource, develop an HTML file to be used as a prototype for the home page of the Privacy Web Site.
- Why is using a prototype layout a good approach to Web Development? When might it not be appropriate? (Be explicit and detailed about your criteria and how this approach fulfills them for Web Development.)
