Clients and Servers II

Due: 3/18/03

Your Name:

The Assignment:

Look around you and find as many examples of clients and servers for those clients in the world that are related to computers. List these below and describe at least one in detail with respect to defined interfaces and/or protocols of behavior. For example the defining protocol that created the web is HTTP; WindowsTM clients connect to their servers through APIs (Application Program Interfaces); etc.
